Summary

Creative frontend engineer with deep practical experience building design-forward, media rich, high performance interactive web applications with a focus on frontend technologies and familiarity with backend infrastructure. Strong background collaborating with designers to feedback and implement refined UI, motion, interaction and typography, while architecting maintainable content management systems that scale with clients' needs and expectations. Experienced in concept evolution, rapid prototyping, interactive visuals, interfacing with clients, and project scoping.

Proficiencies

Sveltekit / React / Vue
Tailwind CSS
Node.js / PHP

Three.js / WebGL / GSAP
Javascript / Typescript
Shopify / Liquid / Hydrogen

Figma / Adobe CS
Terminal / Git / CI/CD
Cursor AI

Experience

No Plans
San Diego, CA (remote)
Mar 2019 – Present
noplans.studio

Creative Technical Lead

Partner at boutique international remote studio building bespoke interactive websites for variety of clients.

- Partnered with creative director, project managers and stakeholders to define technical requirements, system architecture, production timelines and project costs across substantial engagements.
- Conceived, designed and developed a performant WebGL showcase site, with seamless shop integration that resulted in 40% sales increase YOY.
- Collaborated with designers in *Figma* to feedback and prototype screens, flows & components.
- Developed coded prototypes to explore concepts, test interaction models and benchmark performance constraints before full design/production.
- Built performant and responsive frontend applications using TypeScript, modern JS frameworks and advanced animation techniques while maintaining strict design fidelity.
- Implemented backend services from both existing and architected GraphQL API data sources.
- Tested, debugged and delivered projects to function across a wide variety of devices and contexts, pushing the boundaries of new technologies while maintaining practical core functionality.
- Collaborated with engineering partners to optimize servers and refactor codebases for evolving standards, software updates and client needs.
- Mentored junior and intern developers, determining skill levels and guiding contribution abilities on production-level client projects.

Freelance
Berlin, DE (remote)
Jul 2014 – Mar 2019
andrevv.com

Creative Developer

Independent and collaborative work for cultural and creative clients.

- Designed and developed end-to-end custom websites and interactive features.
- Emphasized unique animation, delightful UX and functional creative code.
- Featured on *Awwwards SOTD, The Verge, Siteinspire, Hoverstat.es* and more.

LayerVault
Berlin, DE (remote)
Aug 2013 – Jul 2014

Product Designer & Developer

Early contributor to a "version control for designers" startup.

- Worked remotely with a US based team from Berlin, Germany .
- Collaborated with CPO & CTO to prototype features and helped shape product direction.
- Designed UI components and implemented *Ember.js* frontend for a *Ruby on Rails* backend.

Gidsy
Berlin, DE
Jun 2011 – Aug 2013

Product Designer & Developer

First employee of "Airbnb for experiences" startup

- Helped architect the product frontend from the ground up alongside the CPO & CTO, spanning strategy, UX/UI, frontend engineering, and metrics.
- Ran A/B tests on *Optimizely* for design iterations, user flow and conversion optimization.
- Conceptualized, designed and developed an interactive storytelling user guide, which received 10's of thousands of views and featured on design showcases.

Education

Your Neighbours
Berlin, DE
May 2010 – Aug 2010

Internship

Web design and development internship

- Designed and built a fully responsive Wordpress website for an internal studio project.
- Gained foundational experience in web typography, digital grid systems, and visual hierarchy.

Arizona State University
Tempe, AZ
Sep 2007 – May 2011

Bachelor of Science in Visual Communication

Magna cum laude

- Program developed on Swiss modernism, typography fundamentals, and traditional design foundations.
- Integrated self-directed code based design methods such as data visualizations into projects.
